Lack of Unity/Election

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a kitchen sheet.

Group II, claim(s) 9, drawn to first process.

Group III, claim(s) 10, drawn to second process.

2. The special technical feature of group I is the kitchen sheet have applicant's claimed air permeability. The forgoing special technical feature is shown in the prior art of JP04154573. Therefore, there is no contribution made over the prior art. Hence there is no unity of invention and lack of unity is held by the examiner.

3. A telephone call was made to Surinder Sachar on 1/2/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
